Dear Friends,

These months have been the ‘cruelest’ ones due to Covid and we had to postpone the ‘live’ summer conference envisaged. So, we planned to have a short scientific webinar related to Dilemmas, Caveats and Controversies in Cardiology on May 23rd Sunday, 2021 from 10 AM to 12.30 PM, followed by a GBM. ‘Heart Shorts’, as we call it, is structured as a ten-piece anthology, dealing with practical issues in cardiovascular management in adults as well as in children.

We anticipate an interesting and invigorating academic event where both the young and the seasoned campaigners will be addressing certain vexing issues in cardiology.

Your proactive ‘presence’ and participation is solicited.

Warm regards

Johny Joseph
President

09.50 AM
The Stage is set.
Welcome: Johny Joseph, President - CSIK

09.55 AM
The Stories unfold.
Theme: Zulfikar Ahamed M, Chairman - Scientific Programme

10.00 – 10.55 AM
Anthology Section 1: Dilemmas
The Protagonist Director's Cut

1. Should I routinely advise TMT for all my diabetic patients?
James Thomas Sudhayakumar N

2. Should I routinely Post-dilate or not during my Primary PCI cases?
Script: 40 year old gentleman. Smoker. STEMI-IWMI. RVMI. AV block. CAG – Two vessel disease; Mid RCA total occlusion (culprit), LAD 80% stenosis. TPI, Thrombus aspiration ➔ 1 long DES at nominal pressure ➔ Rhythm normal, BP stabilised. TIMI 3 flow. 1 AM.
Paul Thomas Bahuleyan CG

3. Should I withhold Beta blocker initially in my ADHF patient?
Rajesh Muralidharan Vijayaraghavan G

4. When and How should I start Statin in Pediatric Dyslipidemia?
Script: A 14 year old boy is obese with a BMI of 24.5. Both his parents have diabetes. His BP is 130 /74 mm Hg. Had a lipid profile done: T. Cholesterol 227 mg/dl. HDL –C 35 mg/ dl. LDL –C 160 mg /dl. TG 160 mg/dl.
Renu P Kurup Ramakrishna Pillai V

11.00 – 11.40 AM
Anthology Section 2: Caveats

5. How long should I really continue DAPT after PCI?
Script: 63 year old gentleman. Diabetic. PCI done with 2 overlapping DES to RCA 12 months ago (CAG done following a 'positive' TMT). Mild disease in LAD, LCX. On Aspirin 150 mg OD, Clopidogrel 75 mg OD. No bleeding. No GI symptoms. Normal renal function. Hb – normal. Patient has come for the auspicious 'one year completed' review.
Praveen Velappan Manjuram RJ

6. Which among my HCM patients should receive ICD for Primary prevention of SCD?
Script: 30 year old gentleman. Software engineer. Asymptomatic. 'Abnormal' ECG ➔ Cardiology consult. Echo – HOCM (Gradient 50 mm Hg). No known family history of HCM/SCD. Anxious after 'google search' on HCM.
Hisham Ahamed Venugopal K

7. ICR in TOF – Does everyone live happily ever after?
Deepa S Kumar Krishnakumar R
8. What dietary advice do I really need to offer to my CAD patients?

Vinod Manikantan  
Geevar Zachariah

9. How long should I anticoagulate my DVT/PE patient?

Krishnakumar P  
Ashokan Nambiar C

10. Should I treat ‘Subclinical, Device detected AF’?

Abhilash SP  
Tharakan JM
